Zebra QuickCard Solutions with CardStudio™ 2.0

BRINGING A NEW LEVEL OF SIMPLICITY TO CARD DESIGN AND PRINTING

Regardless of whether your customers are printing identity and access cards, or membership cards, card printing is a crucial aspect of their business. The quality and characteristics of the cards, the time it takes to setup and print, and the time it takes to manage the card issuance solutions all have an impact on your customers business.

The ZC100 and ZC300 Series QuikCard Solution will address it all. This easy-to-use, end-to-end solution makes it simple for any size organization to produce high-quality professional cards in minutes. Everything you need to start printing on day one is included in this feature-and value-packed kit.

The ZC100 or ZC300 Series printers available in the QuikCard solutions are more than just card printers. Zebra's award-winning industrial design team has overhauled the traditional card printer with technology advancements that create a complete card printing solution. Virtually every aspect of card printing has been addressed, from setup, to ease-of-use, and printing flexibility which are unmatched by any competitive printer. You get fast print speeds, push-button simplicity, whether you're printing single- or dual-sided cards. And with its modern design, the slimmest profile and the lowest clearance, the ZC100/300 Series printers can fit in more spaces than any other printer in its class.

Also included in the bundle is the new Zebra CardStudio™ 2.0 Standard Edition software. The software is designed for ease of use, containing an integrated internal database, example projects, and card designs for fast creation of a variety of cards. CardStudio 2.0 brings a new level of simplicity to the design of every card from simple to sophisticated. Whether you are printing a handful of single-side monochrome cards or thousands of double-side full color cards, the well-designed highly-intuitive interface virtually eliminates the need for technical expertise and training.
