ASSET-TRACKING SYSTEM

ENASYS

EXPRESS  
PROFESSIONAL  
ENTERPRISE

KNOW WHERE YOUR ASSETS ARE IN 1/10TH THE TIME

The most customer-driven, dependable, and user-friendly asset and item tracking on the market today. Developed by EDP with 30 years in asset identification, EnaSys is simple to install and easy to use yet powerful in its ability to provide needed information to the user to meet management and regulatory requirements.

Simplify work flow and have critical item and asset information and location at your fingertips. Within all organizations there is an increasingly vital need to know: who has what item, when did they have it, for how long was it in use, and where is it now with as much detail as required. Spreadsheets and other error prone systems are being used to track specimen samples to servers, lab equipment to critical documentation. Increase your organization's efficiency, lower costs and enhance security by taking control of your assets.

BENEFITS

- ROI within the year
