Simple, Paperless Proof of Delivery

SIMPLIFY YOUR BUSINESS

ShipTrack is the world's most innovative logistics management platform that provides simple, paperless proof of delivery. ShipTrack includes a mobile app for drivers, a carrier administration panel to manage deliveries and a branded internet portal for customers to track and trace packages. Carriers use ShipTrack to increase profitable business growth. Retailers leverage ShipTrack to respond to online shoppers' demand for home delivery services. Delivery drivers appreciate the simple, intuitive way the app helps them deliver packages faster, manage loads and easily communicate with management. This cloud-based global service is easy to deploy and offers a simple, pay-as-you-go, pricing model.

ShipTrack has been designed to make it easier than ever for carriers to provide their customers with the information they need with very little effort and expense. We made a conscious effort to eliminate many of the major roadblocks that prevent many carriers from implementing an online shipment tracker.
