# A COMPREHENSIVE AND AFFORDABLE SOLUTION TO TRACK AND MANAGE POLICE ASSETS AND EQUIPMENT

## WiseTrack Software

WiseTrack's centralized SQL database makes it easy to track law enforcement assets; such as, radios, weapons, body armour, less lethal, cell phones, electronics, high-risk assets, and vehicle inventory. Easily import data or add the items into WiseTrack and assign a tracking tag. The software with automatic data collection hardware provides a solid, proven and scalable solution for any size organization.

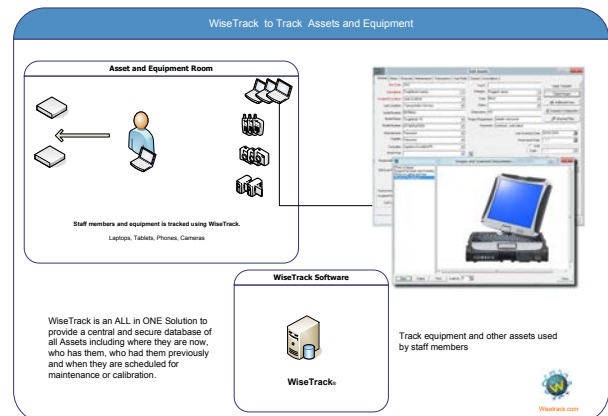

**Easy to Use Interface & Excellent Reporting**

**Save Time by always knowing where equipment is**

**Accountability of assets with full chain of custody & history**

## You decide how to Check-Out and Check-In your equipment

1. Assigned by an equipment Clerk to Police officers
2. Self-Service Check-Out using real-time RFID
3. Hands-free Asset Tracking Visibility (no intervention required to take gear out or in). Just grab the equipment and go, it's all tracked automatically in real-time.

## Bar Code & Radio Frequency Identification (RFID)

Simply connect Zebra/Motorola state-of-the-art data collection technology to your computers and WiseTrack is fully integrated. Assign bar code labels or RFID tags to equipment.

## Solutions for stand-alone units & Municipal Police to National Police or Homeland Security.

Whether you are tracking 100s of items or millions, the solutions are built on the Microsoft Framework, can be installed stand-alone, centralized or on a sub-network.

### Program Features

- Central and Scalable Microsoft SQL Database is easy to customize
- Industry leading solutions for managing check out and return of assets
- Batch or Wireless with state-of-the-art security
- Track asset Maintenance, expiration and preventative alerts
- Manage Fleet/Vehicle inventory and quickly confirm readiness state
- Advanced searching and professional reporting capabilities

*Use portable Zebra/Motorola **RFID** computers to track and manage vehicle inventory without having to scan bar code labels*

### What is it?

You have all that important and specialized equipment, so how do you keep track of it all ? You can use WiseTrack to track items such as; Radios, Cell Phones, Police Gear, electronics, weapons, high-risk assets, Fleet Maintenance, Vehicle inventory and almost anything else you want.

Check-Out & Check-In equipment with this Industry-leading system. WiseTrack can be configured for over-counter check-out, in-person, or hands-free without supervision using RFID. WiseTrack can be used with Bar Code Equipment to scan the badge and code on each item, or hands-free, using Radio Frequency Identification (RFID), without having to stop and sign anything out; speeding up this entire daily process.

### Where is it?

When defining the mandatory location where an asset is found, the name can range from an entire building to something as granular as a shelf in an equipment room. An RFID Portal can be added to track assets in real-time, making it easy to know what items are where.

### Who has it?

Whether an Officer is assigned equipment for permanent issue, long term or just for the day, WiseTrack will capture who is responsible. This provides a complete chain-of-custody reporting system for all assets. With RFID, WiseTrack can also show who was last-seen with the asset, a possible time saver when searching for those missing car keys or a lost radio, for example.

## WiseTrack Software with Zebra Technologies show you a better way of managing your assets
