

# OPTIMIZING YOUR WAREHOUSE HAS NEVER BEEN EASIER WITH HONEYWELL AND WITHOUTWIRE

WithoutWire and Honeywell combined solution provides users with efficient inventory and process optimization for distribution and manufacturing organizations looking for a more ruggedized package. Track all inventory movements using WithoutWire's Warehouse Management System (WMS) and Honeywell's stylish new upgraded Android device, the CK75.

In addition to being smaller and lighter than others in its ultra-rugged class, the CK75 mobile computer is optimized for warehouse and distribution environments with premium, industrial-grade materials for the perfect balance of ruggedness and duty cycle. With built in long range scanning capabilities ... it is a true no-compromise solution!

WithoutWire WMS works best for distribution, manufacturing, and field service environments. Our apps are all natively written to the OS level instead of clunky limited web site apps. WithoutWire includes base integrations with Microsoft Dynamics GP, NAV and SL. Connect it to your system, using our industry standard APIs and developer documentation. WithoutWire runs on almost any Android or iOS sleds from Honeywell.

## WITHOUTWIRE WAREHOUSE MANAGEMENT SOLUTION FEATURES

- **Full Traceability:** Lot, Serial, Expiration Date tracking for FIFO/FEFO stock rotation
- **Track Additional Custom Attributes:** Directed Put-away, with auto-replenishment of bins for JIT supply and optimal fill-rates
- **Full Shipping Integration:** Mobile devices connect to FedEx, UPS, USPS, and many others. Print shipping labels right from the mobile app.
- **OPEN APIs:** Robust and Scalable to any system through our JSON APIs.
- **Use it Free!** Try our Use-it-Free system today by downloading our WithoutWire application from the AppStore.

## HONEYWELL CK75 MOBILE COMPUTER FEATURES

- **Rugged Yet Compact:** 31% smaller and lighter than leading devices in ultra-rugged class.
- **Flexible Operating System Support:** Support Android™ 6.0 Marshmallow operating systems for flexible application support and migration.
- **Built for Rugged Environments:** Withstands 2.4m (8ft) drops to concrete, 2000 (1m) tumbles and has an IP67 seal rating against water and dust
- **Superior Barcode Scanning:** Industry's fastest and farthest imaging engines deliver superior motion tolerance and barcode read performance
- **Cold Storage Option:** Cold Storage version includes touch screen and scan window heaters to support extended use in freezers as well as transitions into and out of freezer areas
